EDUCATION

Concordia University, Montréal, QC

Jan 2026 – Dec 2027 (Expected)

Master of Science in Computer Science

Coursework: Algorithm Design Techniques, Distributed System Design, Programming & Problem Solving

Parul University, Vadodara, India

2021 – 2025

Bachelor of Technology in Computer Science | GPA: 8.31/10

Coursework: Data Structures, Algorithm Design, Databases, Machine Learning, C++, Python

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: React, Next.js, Node.js, Express, FastAPI, Tailwind CSS

ML / Data: PyTorch, Scikit-Learn, Pandas, NumPy, XGBoost

Databases: MySQL, PostgreSQL, ChromaDB & Pinecone (vector databases)

Tools: Git, GitHub Actions (CI/CD), Docker, AWS (S3), Postman, Power BI

PROJECTS

CodeLens — AI Codebase Search & Bug Localization (Full-Stack SaaS) | Python, FastAPI, ChromaDB, React, TypeScript, Docker

- Engineered a full-stack developer tool that indexes Git repositories and embeds source code with sentence-transformers into a ChromaDB vector index, enabling natural-language semantic code search across large codebases.
- Built stack-trace bug localization that embeds error logs and boosts files named in the trace to return ranked, explained results - surfacing the correct source file in the top 5 for ~54% of 28 real bugs benchmarked across 3 open-source repositories.
- Designed a modular FastAPI backend with JWT authentication, background indexing jobs, and AWS S3 storage; containerized with Docker and automated builds and tests via GitHub Actions.

JobTracker AI — Job Application Tracker with Resume Matching | Next.js, TypeScript, FastAPI, Python, MySQL, Pinecone, Google Gemini

- Developed an AI-powered tracker that parses resumes with Google Gemini and computes semantic fit scores (0–100) against job descriptions using vector embeddings stored in Pinecone.
- Built a Kanban pipeline board and analytics dashboard with AI-generated resume-improvement and skill-gap suggestions; deployed live on Vercel.

Smart Fleet Management System | Python, Pandas, NumPy, scikit-learn, XGBoost

- Built and compared ML models (Logistic Regression, Random Forest, XGBoost) to predict fuel efficiency and flag risky driver behavior.
- Implemented an end-to-end pipeline from data preprocessing to modeling, surfacing predictions through a frontend–backend web system for operational decision support.

EXPERIENCE

Bharti Soft Tech Pvt. Ltd., India

Dec 2024 – Mar 2025

Data Science Intern

- Built ETL pipelines in Python to extract and transform data from external REST APIs and web sources, improving data availability for downstream reporting.
- Developed interactive Power BI dashboards for sales and HR analytics with live data refresh, enabling stakeholders to track key operational metrics in real time.
- Performed data cleaning and validation across multiple datasets to ensure accuracy and consistency prior to analysis and visualization.
- Collaborated with the team to document data-handling processes and deliver reporting under daily deadlines.
